

Offer for a unique dosing closure system

CG Pharma Pack AB in Sweden has developed a unique and patented dosing closure system.

We are now seeking a partner that will be able to produce and market this globally unique system.

We can offer you a premium product that was created in order to bring added value to high quality products.

Facts

The system is patented and has a design pattern patent in Europe, Russia and USA.

Dosing 10 ml, with repeatability

Adapted for a 38 mm neck finish

Production capacity of 10 000 000 pcs per year

Two sets of tooling

Two semi-automatic assembly lines

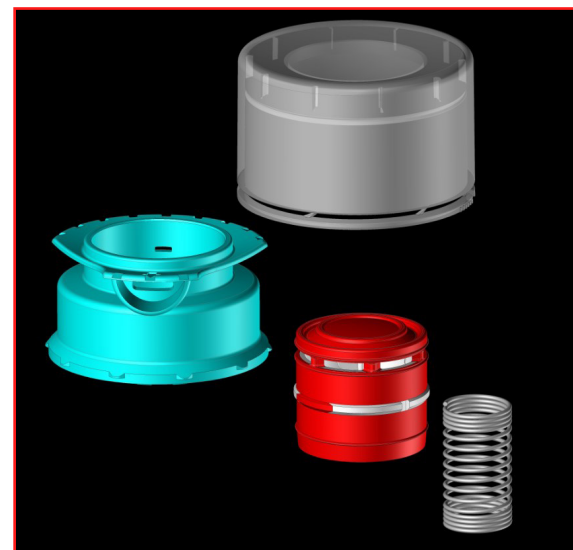

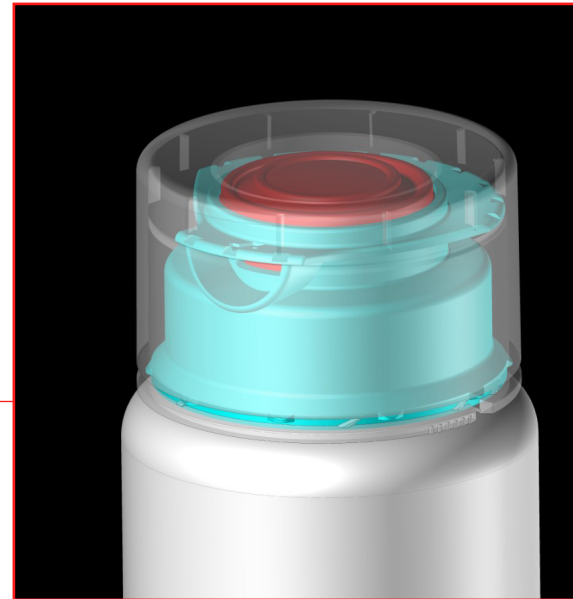

With the high capacity of the tooling there are good opportunities for rewarding production profits

Dosing system consists of 4 details

- Outer cap
- Closure
- Dosing button in two-component material
- Spring

The system is well suited for:

- Water based solutions
- Alcohol based solutions
- Silicon oil
- Sugar solutions

For the right partner we can offer an exclusive production right.

We offer you a fantastic opportunity to develop a unique concept.

The developed system is ready to meet the needs of the market
